

Zoom Polling

In order to use polling in your Zoom class, you must set up the poll before the meeting. You can only do this online through your account at <https://zoom.us/>; you cannot set up a poll through the application on your computer.

First, login to your account at <https://zoom.us/>

Next, go Meetings from the menu list along the left hand side.

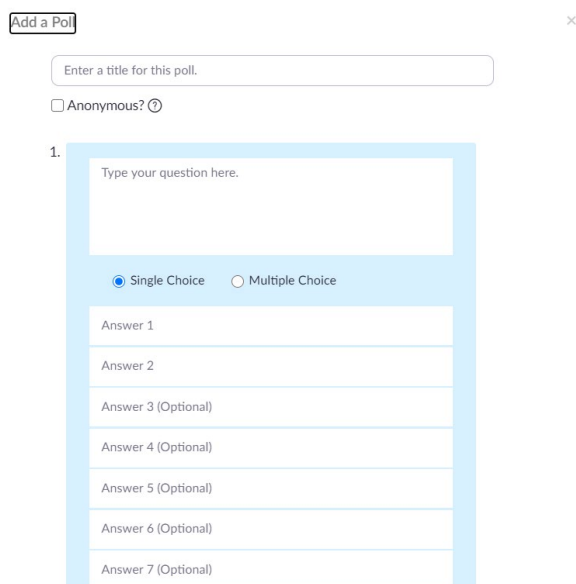

Look for your class from the list and click directly on the name of the class. You should then see all the details of the class. Scroll down.

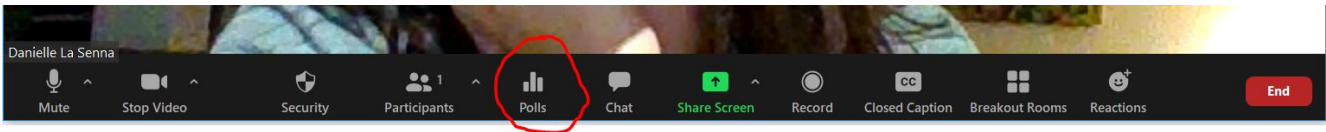

At the very bottom, you should see:

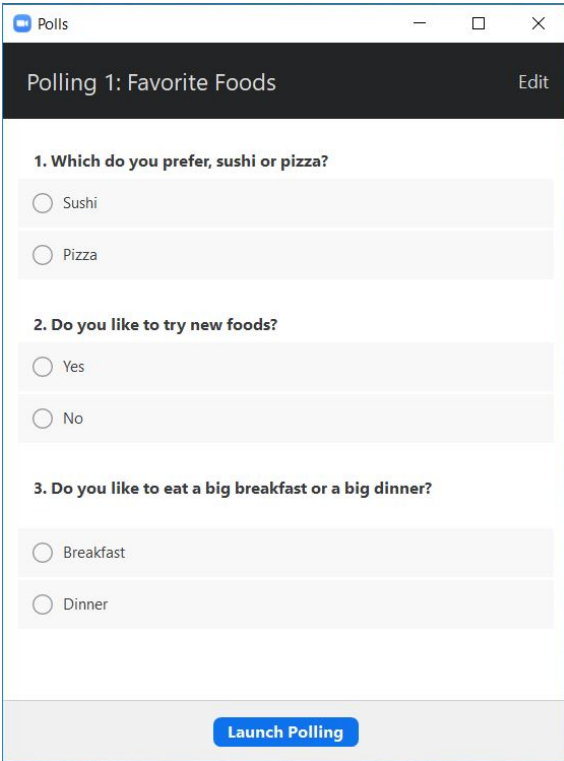

Click Add. Enter your questions and the answer options. Click save.

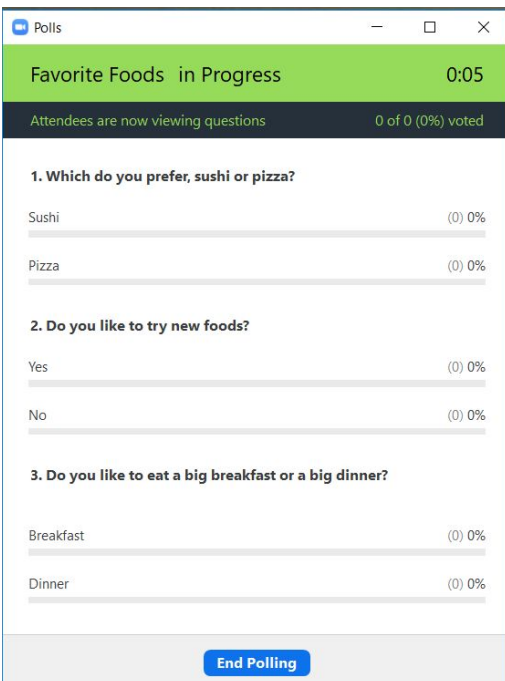

Now, when you are in your class, the controls along the bottom will show Polls:

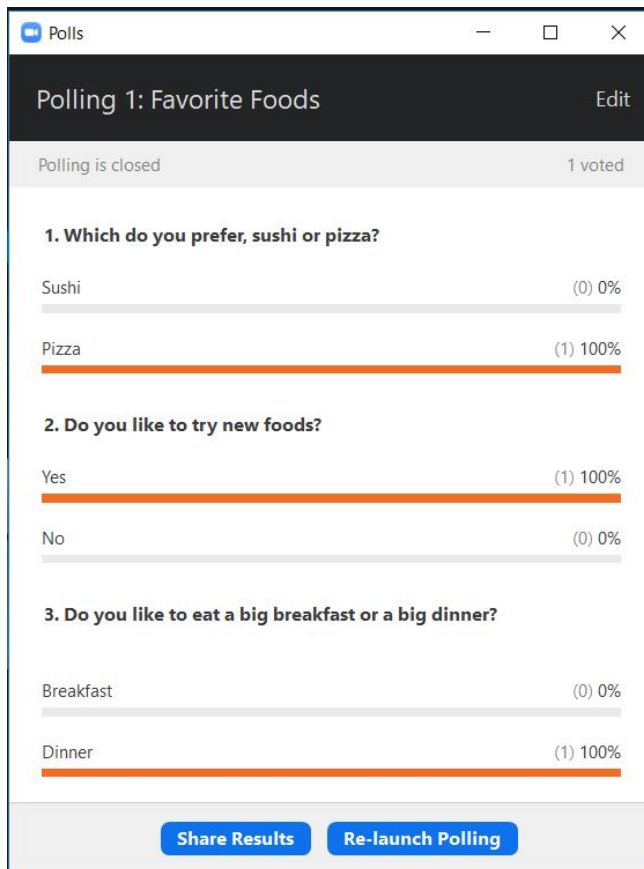

Click on this to run your poll by clicking **Launch Polling** at the bottom:

You will then see a window that shows the poll is in progress:

You can see the students answering in real time. When you are ready to stop polling, click End Polling. You will then have the option to share the results with the students:

You can also rerun the same poll by clicking Re-launch Polling. However, please note that if you do this, it will delete the results of the first launch.
